Euro Hinge

TURNED EDGE BINDERS

Routed Board Hinge

Euro Hinge w/ Wrap Around Flap

Euro-Hinge Strength

One piece board with compressed scores that form the strongest, most durable ring binder hinge in the market.

Don't Forget!

Just like a new baseball glove, or quality pair of dress shoes, the Euro Hinge exhibits "memory" characteristics which dissipate with use. This "memory" can leave the binder open from 5 to 180 degrees depending on spine size, amount of use, etc.

Reduce Memory

If hinge "memory" is a concern Colad offers various ways to reduce memory in our binders:

Pre-Break Euro Hinge Scores: We pre-break the scores before inserting the ring mechanism which dramatically reduces the memory in the scores.

Special Pack-Outs: Memory may be reduced over time while the binders sit in inventory and special pack-outs can help speed this process.

Routed Board: The board is routed away from the hinge which nearly eliminates the memory but also reduces the strength of the hinge.

Unitized Board: This is a three piece board construction held together by fabric or paper before wrapped with the litho stock, which means this hinge can tear very easily but will have close to no memory!

Wrap-Around Flap with Velcro: This will not reduce the memory but will keep the binder closed when the velcro is engaged.

Paperboard Binder Styles: Colad offers various styles and strengths of binders which allows flexibility and tailors the binder to the application.

The Best Binders

Unlimited Graphic Capabilities

Ultimate in Strength and Durability

Amazing Value for the Cost

Light-weight, Reducing Freight or Mailing Costs over other Substrates
