Colad Spray Sample Cards

Spray Sample Cards made out of plasticised paper. Available in five versions, equipped with a Ø 15 mm hole and central line in different colours to determine the coverage. Per set of 250 pcs.

Test the accuracy of your spray paint in a quick and inexpensive way!
Our flexible and lightweight Spray Sample Cards make color matching easier and more accurate while simultaneously protecting your surface from scratches.

These Colad Spray Sample Cards are developed to meet the diverse needs of professionals while supporting eco-friendly practices. They have a versatile coating compatibility, making them suitable for precise colour matching of both water-based and solvent-based coatings. The user-friendly, flexible design with convenient sizes comes with a Ø 15 mm hole and central coverage guide in five essential colour degrees, making it easy to determine the degree of coverage. The cards don't have sharp edges, preventing damaging the surface during the work process. They are produced from plasticised paper and contain 15% recycled material.

Ideal to combine with our Colad Spray Sample Holder (Art. no. 931410), specially designed to match with these spray sample cards.

Features:
- Suitable for water- and solvent-based coatings
- Managable size: 10.5 x 15 cm
- Made from 15% recycled material
- Fitted with a Ø 15 mm hole and central coverage guide
- Available in five essential colours

Benefits:
- Ensures reliable colour matching
- Reduces environmental impact
- Easy to apply and handle due to the flexible material
- Lower risk of damaging surfaces due to the lack of sharp edges
- About 75 % lighter than the average metal spray sample.

Frequently Asked Questions

> **Can these cards be used with both water-based and solvent-based coatings?**
Yes, our plasticised paper Spray Sample Cards are designed to be compatible with both types of coatings.

> **What is the environmental impact of these cards?**
The cards are made with 15% recycled material, helping to reduce waste and support sustainability efforts.

> **How do I ensure that the correct amount of coating is applied?**
The central line on each card serves as a coverage guide to help users apply the correct amount of coating.

> **Are these cards safer to use than metal cards?**
Yes, these cards are more flexible and have no sharp edges, reducing the risk of damaging surfaces during use.

> **Are these cards considerably lighter than regular Metal Spray Samples.**
Yes, these light-weight cards weigh 3.75 grams per card versus around 15 grams for an average metal spray sample, making these cards easy to use, and way more flexible dan conventional spray samples.
